

Eugene Choi

eugene@snu.ac.kr | eugene-choi.vercel.app | github.com/euxxnia

Research Interests

Human-AI Interaction, Information Visualization, Personal Informatics. I am interested in designing AI-powered interactive systems that align with how people **represent, organize, and interpret information**—capturing personal and contextual ways of structuring experiences, records, and thoughts, and using them to support memory, sensemaking, and decision-making.

Education

Seoul National University, B.A. in Visual Communication Design	Mar 2022 – Feb 2027 (exp.)
Seoul National University, B.S. in Computer Science & Engineering	Sep 2024 – Feb 2027 (exp.)

Publications

Investigating Assistant Bias in LLM User Simulators Using a Role Vector

Daeheon Jeong, Yoonjoo Lee, **Eugene Choi**, Sinie van der Ben, and Juho Kim
Findings of the Association for Computational Linguistics: EMNLP 2026

Bridging Gulfs in UI Generation through Semantic Guidance

Seokhyeon Park, Soohyun Lee, **Eugene Choi**, Hyunwoo Kim, Minkyu Kweon, Yumin Song, and Jinwook Seo
Proceedings of the 2026 CHI Conference on Human Factors in Computing Systems (CHI '26) [DOI] [PDF]

Under Review

- **First author.** One full paper on mobile personal informatics
- **Co-author.** One full paper on generative UI design

Research Experience

Undergraduate Research Intern @ SNU Human-Computer Interaction Lab	Jan 2025 – Present
---	--------------------

- Advisor: Prof. Jinwook Seo
- Led a first-authored HCI research project, co-advised by Prof. Eunhyung Jo, spanning problem formulation, system development, user studies, analysis, and academic writing.
- Contributed to research on generative UI and Human-AI interaction, including published work on using design semantics to support UI generation and an industry-collaborative research project on AI-generated user interfaces
- Currently leading research on personalized information representations and active reading.

Research Intern @ POSTECH H2CI Lab	Jun 2026 – Aug 2026
---	---------------------

- Advisor: Prof. Eunhyung Jo
- Trained in qualitative analysis and academic writing for HCI research.

Research Intern @ KAIST KIXLAB	Jan 2026 – May 2026
---------------------------------------	---------------------

- Advisor: Prof. Juho Kim
- Analyzed assistant bias in LLM user simulators and explored activation steering for more user-like behavior.
- Explored ways to capture and resurface users' tacit knowledge formed while working with AI agents.

Design & Industry Experience

Product Designer @ WaffleStudio (SNU Web&App Development Club)	Jan 2023 – Apr 2026
---	---------------------

- Planned and designed the course timetable app **SNUTT**, serving about 20K active users.
- Designed the service and interface of the **SNU CSE homepage** renewal and managed ongoing updates.
- Led design seminars (2024–2025), teaching Figma and design system practices to designers and developers.
- **Vice President** (Feb 2025 – Aug 2025): co-managed a 300+ member club and led partnerships with external IT companies.

UX Advisor @ VecMul, Seoul	May 2024 – Jul 2024
• Provided UX consultation for a community service integrating multiple LLMs.	
Product Designer @ Blockwave Labs, Seoul	Mar 2024 – Jun 2024
• Planned and designed a lending web service for a blockchain solution.	

Selected Projects

TraceWeaver	Sep 2025 – Dec 2025
• Graduate InfoVis course project. Designed a system that uses LLMs to extract research decisions from meeting records and visualizes their evolution as provenance; evaluated through a user study.	
SNU HCIL Homepage	Apr 2025 – Aug 2025
• Designed and partly implemented the interface for the SNU HCI Lab homepage renewal.	
TIMESPACE	Sep 2024 – Dec 2024
• Industry-academic project with the NAVER Map & Place design team; planned and designed a study-space scheduling service to connect online and offline experiences.	
Admit One	Mar 2024 – Jul 2024
• Designed and evaluated an interactive web system that recommends movies via two-way LLM-based conversation, as part of an HCI course project. [Poster]	
Designing a Product	Mar 2024 – Jul 2024
• Interpreted the roles of design, development, and users in product making as text and abstract graphics; exhibited a graphic kit and built a web with Vanilla JS. [Github]	
Icebreaker	Feb 2024
• Designed an interactive mobile web that helps people break the ice using an LLM and QR codes, producing personal cards as visual output. [Blog Article]	
Emotion Friend	Mar 2023 – Jun 2023
• Built a typographic emotion-tracking tool in Processing, in which the selected mood changes the text's content, size, and opacity, with an interactive web for exploring accumulated records. [Github] [Film]	
Two Portraits Conversing	Sep 2022 – Dec 2022
• Built and exhibited a chatbot-style interactive system (Python, Streamlit) that expresses a person's inner self through an imaginary conversation generated from survey input. [Video]	

Talks & Service

Student Volunteer, SIGCHI Korea Local Chapter	Jun 2025
Student Volunteer, Friends of Figma Seoul	Apr 2025
Invited Speaker, SNU Interdisciplinary Major Information Session	Sep 2024

Skills

Programming: Python, Java, C, C++ , JavaScript/TypeScript, React
Research Methods: System design & implementation, deployment studies, interviews, qualitative analysis
Design: Figma, Adobe Illustrator / Photoshop / After Effects / Premiere Pro, Blender, Cinema 4D
